PROFILE

A full-stack developer with a deep passion for coding, an eye for detail, and a commitment to bringing web applications to life by seamlessly integrating UI design with user-friendly functionality that ensures a fantastic user experience. I have a strong enthusiasm for tackling complex problems to strengthen my learning and critical thinking abilities. Outside of work I enjoy gaming, pool table and learning new technologies such as WebGL (3D).

SKILLS

- Javascript/Typescript (**main**) & Java
- **Back End:**
 - Node.js
 - Express.js
 - GraphQL
- **Front End:**
 - HTML5 & CSS/SCSS
 - Vue.js
 - React
- **Databases:**
 - MySQL
 - PostgreSQL
 - MongoDB
- **Other:**
 - Version Control (GIT)
 - Web & Software Design
 - Problem Solving

EDUCATION

BACHELOR OF SCIENCE (COMPUTER SCIENCE)

- University of Witwatersand
- 2019-2021

SECONDARY SCHOOL

- Phoenix Secondary School
- 2014-2019

CERTIFICATIONS

- Complete Javascript Course
- Typescript
- Vue - The Complete Guide
- Node.js, Express, MongoDB Bootcamp

EXPERIENCE

MWR CyberSec

Apr 2024 - Apr 2025

Software Developer

Tech: Vue, Typescript, CSS/SCSS, GraphQL, Express, MongoDB, PostgreSQL, Redis, Mocha, Chai, Sinon.js

- Worked on an internal web application integrating backend microservices for network scanning, file upload and storage, and user management.
- Completed APPSEC101 whereby I gained practical experience with web security and vulnerabilities such as XSS, Injection, Cryptography, CSRF, Auth Flaws, etc

Huawei

Aug 2022 - Mar 2024

SOFTWARE DEVELOPER

Tech: Vue, CSS/SCSS, Axios, Express, MySQL, GSAP

Front End:

- Responsible for designing and optimizing user interfaces with Vue.js, ensuring seamless functionality and support.
- Developed various internal customer web applications, including data visualization, scheduling, and basic CRUD applications
- Enhanced an internal task tracking web application by implementing a progress history feature and enabling seamless task update notifications to customers via email.

Back End:

- REST API design and implementation.
- Complex SQL queries for different data needs.
- Table design (UML).

Amazon

Dec 2021 - Feb 2022

SOFTWARE DEVELOPER INTERN

Tech: Java, AWS Services, SQL

- Designed and developed an ETL data pipeline that was responsible for automatically pulling data across different regions into a central region every day.
- Gained experience in many AWS services such as Lambda, DynamoDB and AWS Glue.
- Worked with AWS Java SDK to create and configure the above mentioned services to build the ETL pipeline.
- Used SQL to transform the data into a suitable form/structure for further processing using AWS Glue.
